

VISUAL ANALYTICS: EXPLAINABLE AI LAB

AB MOSCA (THEY/THEM)

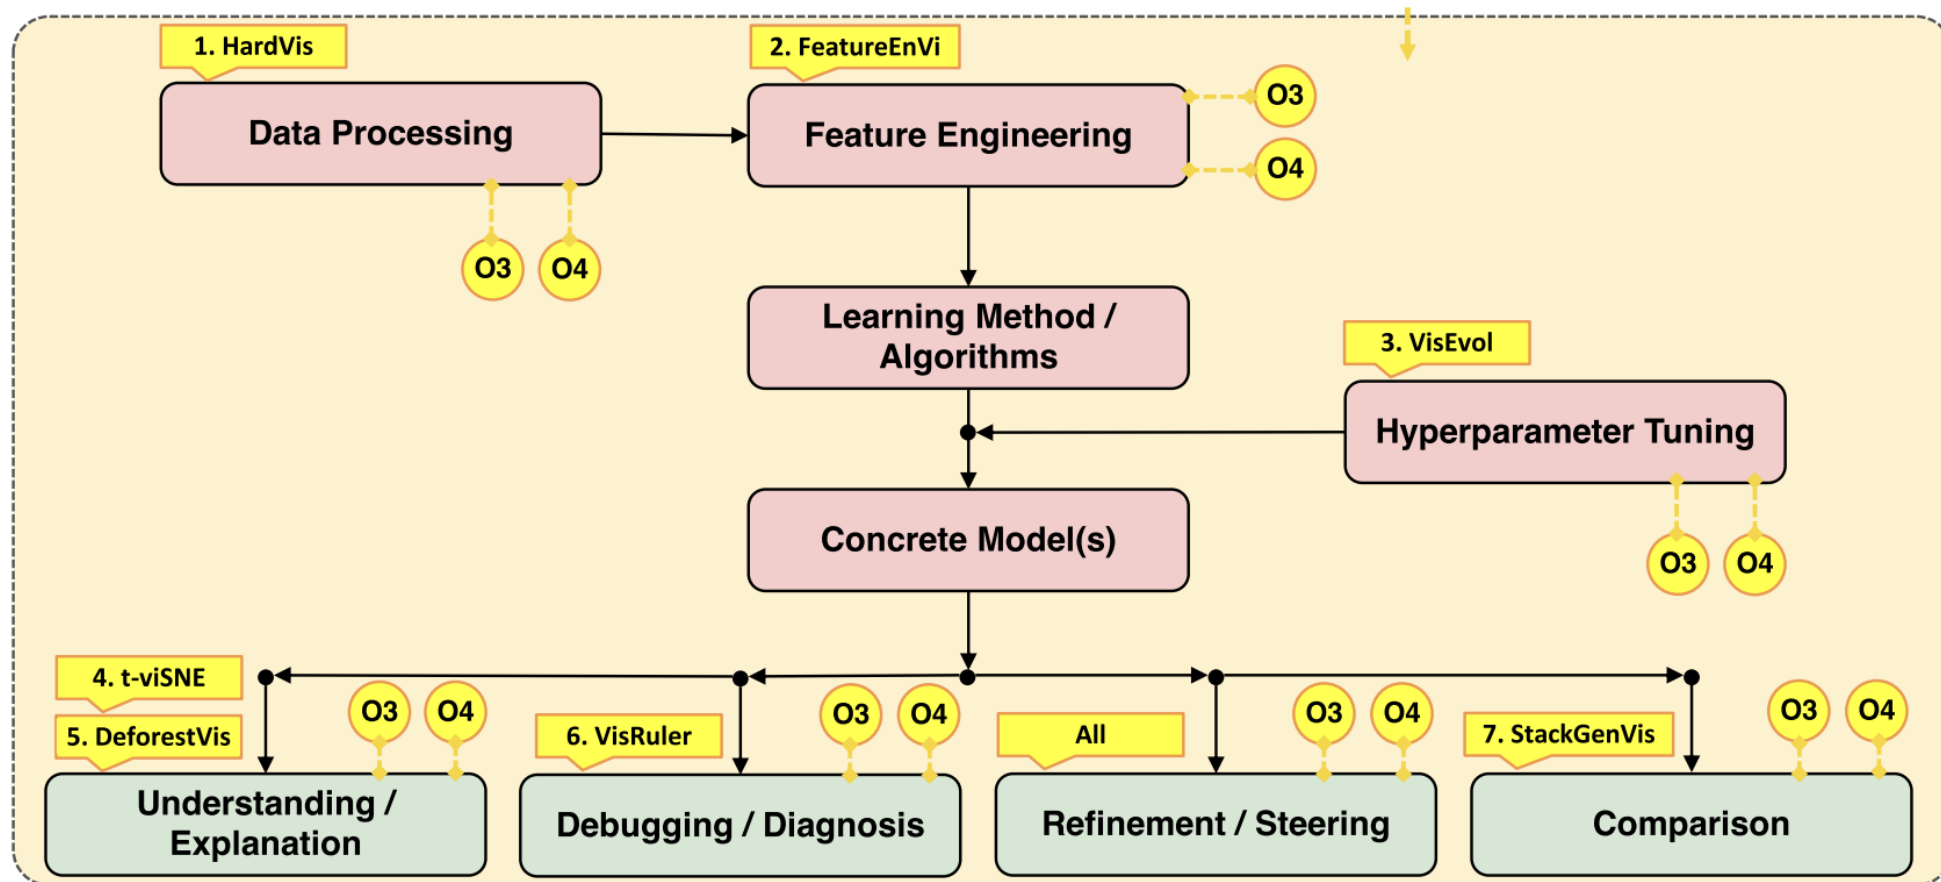

TODAY'S PLAN

- Warm up
- Intro to “explainables / explorables”
- Create your own

WARM UP

- What is the design space for XAI?
- What is one XAI visualization technique we looked at last class?
- What is an open area in XAI research?

XAI AND VISUALIZATION: DESIGN SPACE

AI EXPLAINABLES / EXPLORABLES

- VISxAI is a workshop focused on using visualization to explain AI algorithms / techniques
- Each year, participants submit web-based visualizations that walk through the inner workings of an AI algorithm
- Check out one of the Hall of Fame submissions: <https://visxai.io/#hall-of-fame>

CREATE AN AI EXPLAINABLE / EXPLORABLE

- Choose an AI or ML technique that interests you. It does not have to be extremely complex, for example you could pick logistic regression
- If you don't know much about the technique, look up the basics of how it works
- Sketch an outline to an explainable you could make for the technique you chose
- Implement your idea as a webpage
