

CSC/SDS 235: Visual Analytics

Mid-semester Project: State of the Art in VA

This is a pair assignment – working with a different size group (including solo) must be approved prior to submitting your assignment. You may work with a partner in either section of the class.

Goals:

- Explore recent output in Visual Analytics research
- Read and communicate research output to a general audience

Instructions

The primary publishing venues for new visual analytic research are:

1. IEEE VIS: <https://ieevis.org/year/2025/welcome>
2. EuroVis: <https://www.eurovis2025.lu/>

For this assignment you will choose a recent VA research contribution, read the paper, and communicate the paper's contents to a general audience. Please following these guidelines:

- The paper you chose must be a full paper and must be from 2025. On the IEEE VIS and EuroVis websites linked above you can find complete lists of accepted papers.
- To communicate the paper's contents to a general audience you can:
 - Create a zine or comic
 - Record a <=15 min podcast
 - Create a reel(s) (think short video or series of videos for Instagram or tick toc)
 - Other creative choice (must be approved by Ab)
- Your communication must include:
 1. Paper title and authors' names
 2. Overview of the research (What did they do?)
 3. Research purpose/impact (Why did they do it? What was gained?)
 4. Overview of methods (How was the research performed?)
 5. Final product (What was the research output?)
 6. Recap of limitations / next steps (What are the caveats? What's next?)

Submission

Submit your project on Gradescope. How to submit as a group:

<https://guides.gradescope.com/hc/en-us/articles/21863861823373-Adding-Group-Members-to-a-Submission>.

Rubric

The following matches the rubric you will see on Gradescope.

Points	Criteria
2	Submission is well-formatted and easy to understand
2	Submission is scoped to a general audience
2	Paper title and authors' names
2	Overview of the research (What did they do?)
2	Research purpose/impact (Why did they do it? What was gained?)
2	Overview of methods (How was the research performed?)
2	Final product (What was the research output?)
2	Recap of limitations / next steps (What are the caveats? What's next?)
4	Creativity / Attention to detail / Scope of output
TOTAL	20
